

CITY OF BURLEY

CROSS CONNECTION CONTROL PROGRAM REFERENCE MATERIAL

UPDATED ON DECEMBER 14, 2015

As your water purveyor, the City of Burley is required by State law to administer a Cross Connection Control Program, often referred to as the Backflow Prevention Program. The following program information is available for your use.

The current City of Burley Water System Protection Ordinance is Ordinance #1256, dated April 7, 2009. It is available from the City Clerk at (208) 878-2224 or [click here](#).

The Department of Environmental Quality's Drinking Water Cross Connection Control Programs informational brochure is available at http://www.deq.idaho.gov/media/517436-dw_cross_connection_fs.pdf

The Department of Environmental Quality's Cross Connection Control Frequently Asked Questions are available at <http://www.deq.idaho.gov/media/1117274/cross-connection-control-faq.pdf>

The State of Idaho Administrative Code (IDAPA Rules) concerning Cross Connection is located at: <http://adminrules.idaho.gov/rules/current/58/0108.pdf>
Reference section 543 (Page 123) and section 552.06 (Page 132)

Backflow assemblies must be listed in the University of Southern California (USC) Foundation for Cross Connection Control and Hydraulic Research List of Approved Backflow Prevention Assemblies. This document is available at <http://www.usc.edu/dept/fccchr/list.html>

Please contact the Lead Water Operator/Foreman at (208) 878-2103 or burleywaterforeman@pmt.org with any questions and to discuss the backflow prevention measures that may be required for your home or business.
