

CITY OF BURLEY LOW PRESSURE IRRIGATION SYSTEM

Certain areas of the City of Burley are provided irrigation water through a separate low pressure irrigation system. In general, the areas having this service available are from 5th Street to 16th Street between Hiland Avenue and Park Avenue and from 16th Street to 22nd Street between Almo Avenue and Park Avenue. Irrigation water is not for personal, consumptive use. It has not been treated and/or tested for purity. The low pressure irrigation system is typically run from April 15 to September 30. The users will rotate watering times on 2 day intervals as indicated in the schedule below. Compliance with the schedule helps to maintain adequate pressures for satisfactory sprinkling by all users. Please cooperate with your neighbor by obeying the City of Burley ordinance and watering on schedule. The low pressure irrigation watering schedule only applies to users of the low pressure irrigation system. Users of the separate potable (culinary) water system for irrigation use are not bound to a certain watering schedule at this time.

WATERING SCHEDULE FOR LOW PRESSURE USERS ONLY
