Trevor Reno
Carol Anderson
Kim Seely

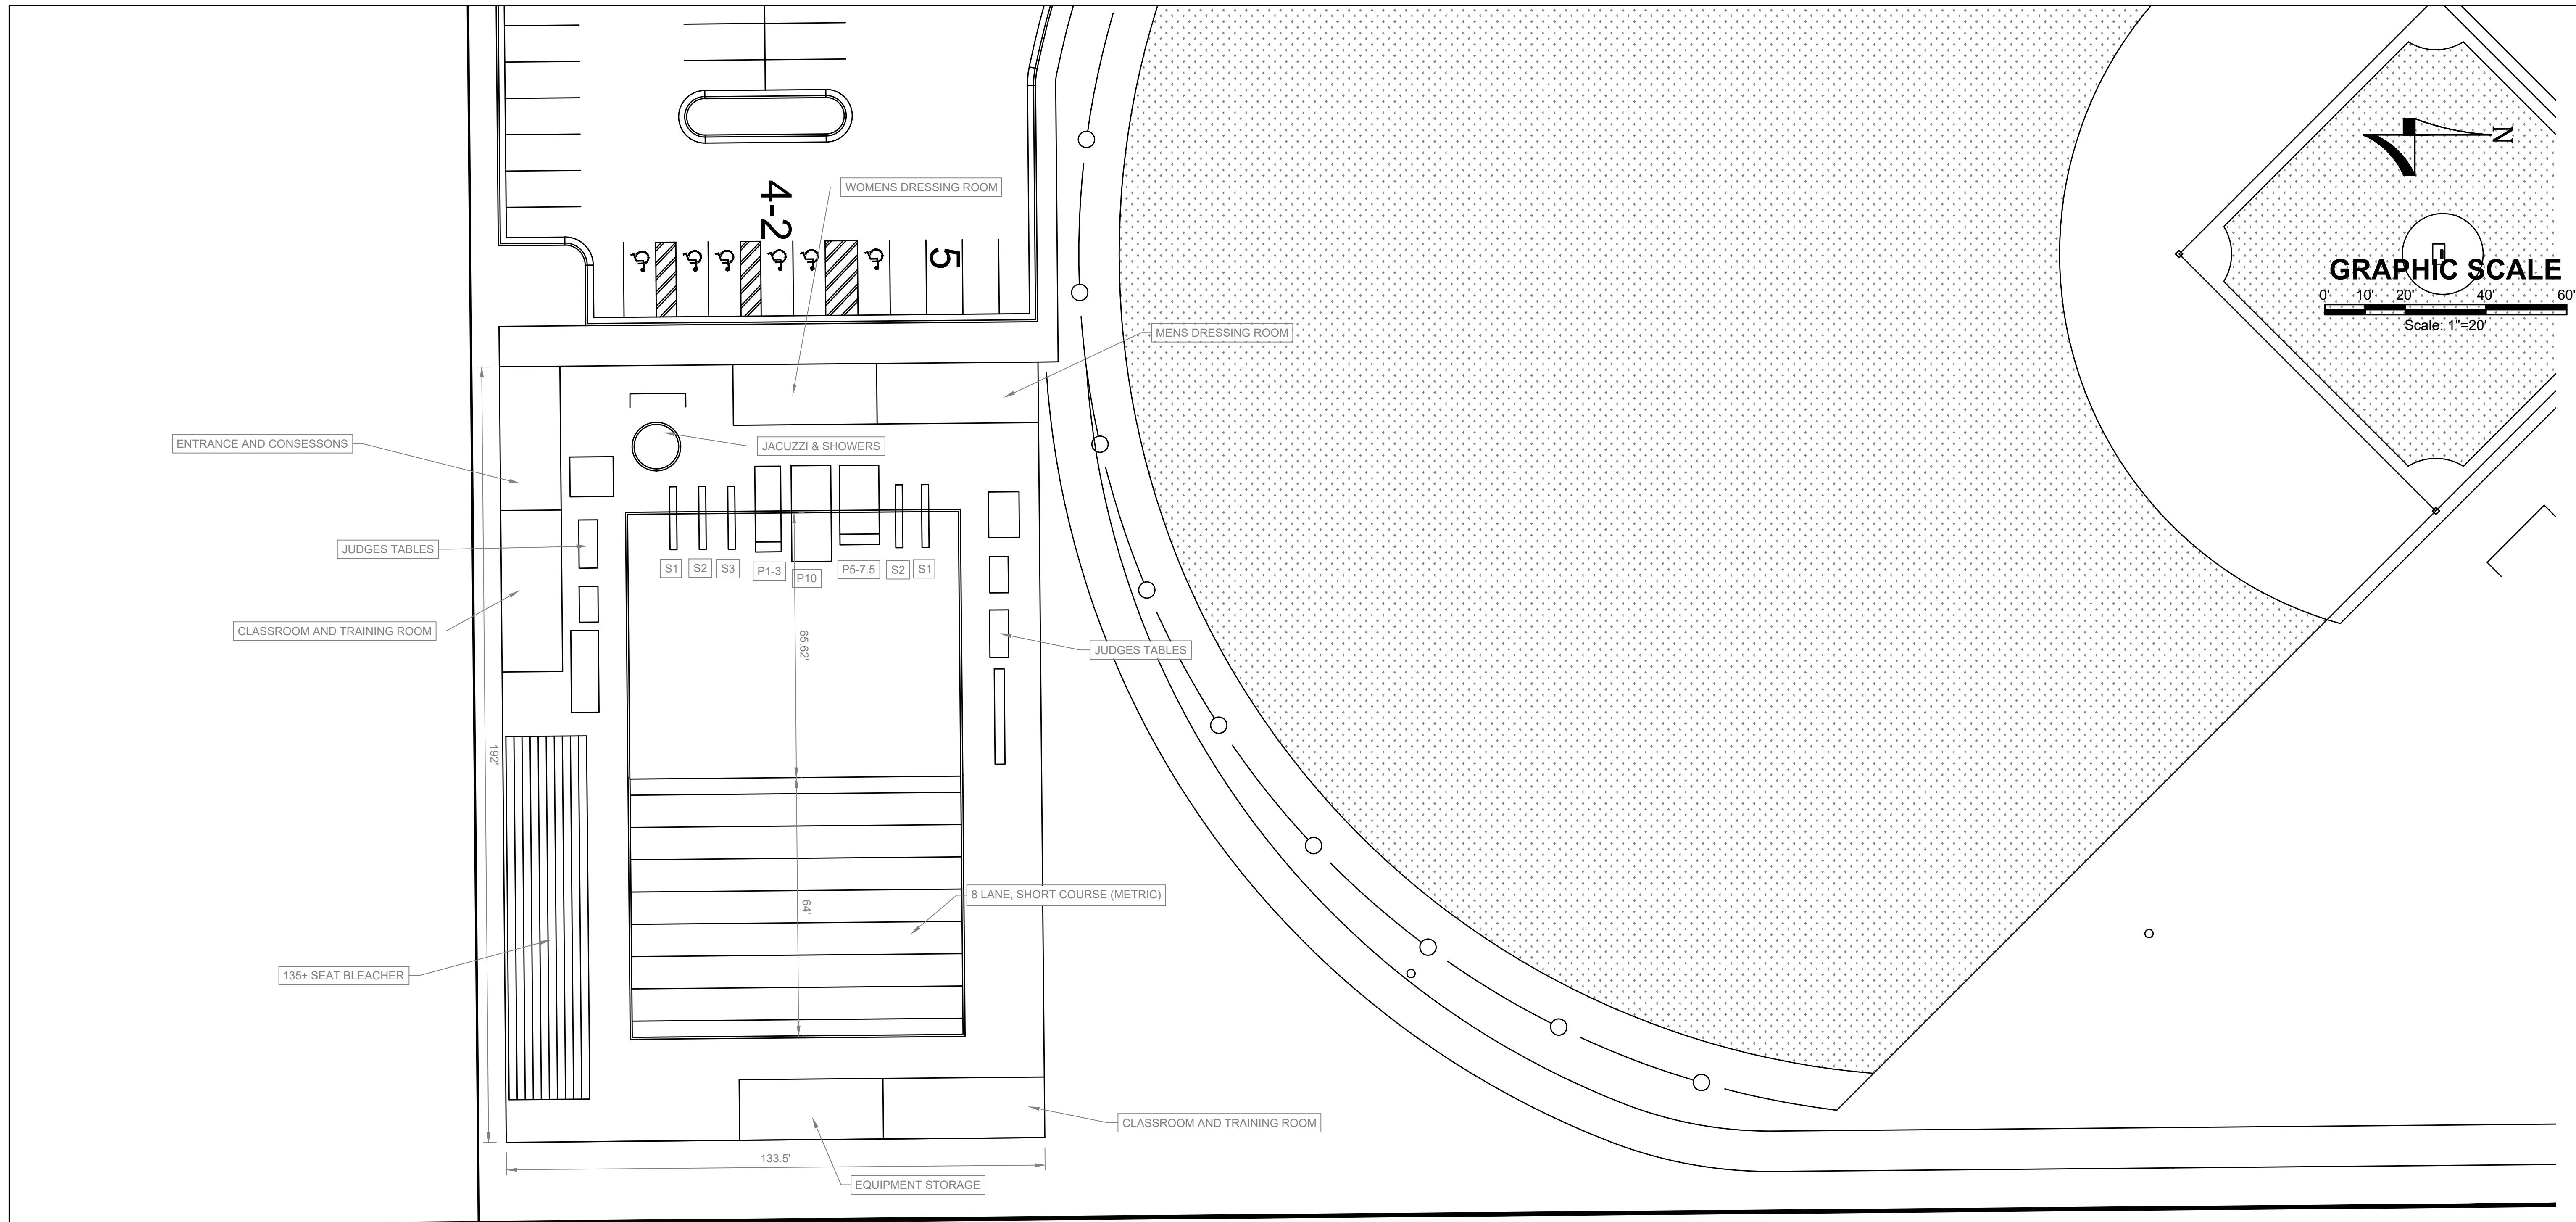

Minutes

1. Discussion of Nielson Farm Park and Contract

A drawing was displayed of the future park. A few items were changed from the last discussion. It was explained that the design went from six soccer fields to four. Twenty acres have been reserved and have easy access to the road. An outdoor water park was added, an indoor field was added. The RV parking was removed.

There was a discussion about the sun and the fields, the parking lot and the balls, the ground and natural bleachers. There was a discussion about drain fields and a walking path that would 0.935 miles that would go around the park.

They discussed expanding the taxing district to cover the expenses and increasing the existing tax district fees. They talked about the election process and past election success. It was stated that the next step would be to go to the City Council and get their approval. They would invite different clubs and organizations to the meeting to try to get support for the park and to get people interested and involved in this project.
